Note: Regulations define "economic distress" as: lacking a major university, receiving less than the per capita fair share of OSLW funding from 2002-2023, having low EAV per capita relative to the state average, and having a high share of its population in poverty.

Population data (for per capita calculations) and poverty data are 2021 American Community Survey 5 year estimates for various geographies that match or nearly match district boundaries. Park districts can be any one or more of the following: census tract, place (municipality), county subdivision (township), or county. Forest preserve districts are always counties. Municipalities (cities, villages, towns) are census places. Townships are census county subdivisions. **EAV data** are from Illinois Department of Revenue Taxing Statistics for 2021, Table 28. District EAV, CTE and Total Rate by Property Class. Available at <https://data.illinois.gov/dataset/2016-property-tax-statistics/resource/394f5ee6-1db7-4794-8ae3-7599815a94d5> (last accessed July 23, 2023). EAV were extracted for only counties, townships, municipalities (cities, villages, towns), park districts, forest preserve districts, and conservation districts. **OSLAD (prior IDNR funding) data** are available as internal records with IDNR.
